JOBS AT PINKERTON

Operations Manager
San Francisco, CA

The Operations Manager will coordinate the service delivery functions for Pinkerton's Deployable Assets (PDA) and support the Regional Operations Manager (ROM) with employee management and administrative oversight.

Risk Solutions Analyst
Miami, FL

The Risk Solutions Analyst will be responsible for understanding strategic and operational objectives, identifying issues, conducting research, developing hypotheses, designing, and conducting analysis, and presenting recommendations to create value for Pinkerton's clients.

Regional Business Continuity Manager - APAC
Singapore

The Security & Business Continuity Manager is accountable for all elements of the Corporate Security and Business Continuity (BC) programs at all China-based corporate client locations. The Manager provides subject matter expertise to other company sites within the APAC, as needed.

GSOC Support Operator
El Segundo, CA

The GSOC Support Operator, assigned to a specific client, oversees the daily operations of the Global Security Operations Center. The Operator will vet potential and/or actual crisis response activations.

Intelligence Analyst
Tempe, AZ

The Intelligence Analyst, assigned to a specific client, serves as the subject matter expert on all intelligence-related tasks including processes, support requirements, technical aspects, and operational methods. The Intelligence Analyst oversees workflow and trains analysts in report production.

Background Screener - Americas
Redmond, WA

The Background Screener will review and evaluate background screening results, for the Americas region, provided by a third-party supplier, the employee candidate and/or various other third party record providers. The position will maintain key relationships with staffing in order to provide responsive and timely processing of background screenings.

Agent
San Bernardino, CA

The Agent will perform a variety of assignments including concierge-level, residential, or event security, response services, basic driving, and investigations.

Production Technology Engineer
Berkshire, United Kingdom

The role is to support a Film Production Security team assessing the network & security requirements of each Tier 1 production during the preparation stages and being directly involved in implementing those plans throughout the shoot and post-production periods. The Production Technology Engineer will support technology infrastructure, storage, and network solutions that adhere to Content Security procedures and policies. The Production Technology Engineer will also work closely with and provide advice and support to production and act as the first point of contact on Networking issues for crew in the studio and on location.

FEATURED TRAINING PARTNERS

[EnCorps STEM Teachers Program](#)

The EnCorps STEM Military Pathway, located in California and Colorado, transitions military veterans and spouses who have experience in science, technology, engineering, and math fields into middle and high school teachers. EnCorps provides the pathway, training and support to successfully transition your industry and military experience to the classroom. Inspire the next generation, serve again and ensure that all students receive a high quality education, regardless of their background or circumstances. [Learn more and apply here](#).
