

FEATURED EMPLOYER

ABOUT MASCO

When you join Masco, you join a team that works every day to improve the way people experience living in their homes and communities. We look for people who are seekers—who thirst for knowledge and have a passion for challenging the status quo. Who see their work—and the world—through a “possibilities” mindset, always exploring what can be improved or created when we open ourselves to new ways of learning, thinking and inventing.

JOBS AT MASCO

WAREHOUSE FORKLIFT OPERATOR

Morgantown, KY

Responsible for the appropriate storage and transactions of received items to bins, transaction of components and finished goods to the designated locations, maintaining tote and skid locations to set levels and accurate outbound distribution of finished goods to fill consumer orders. Works in cross functional group to ensure integrity of inventory and customer orders. Ability to learn computer systems and obtain lift license required

GROUP LEADER

Lapeer, MI

The Group Leader is responsible for overseeing daily manufacturing operations, ensuring safety, quality, productivity, and efficiency within the production team. Reporting to the Production Manager, this role leads and supports Team Leaders and hourly employees, fostering a culture of continuous improvement, accountability, and collaboration. The Group Leader plays a critical role in executing production plans, meeting operational targets, and aligning activities with the company's long-term business strategy. This is a second shift opportunity in our Lapeer, Michigan facility.

WOODWORKER

Cokato, MN

Fast-paced and exciting job responsibilities include the operation of various power and hand tools to manufacture high-quality sauna wood components. General hours are 6 am to 3 pm Monday-Thursday and 6 am to noon on Fridays. No weekend work!

CONTROLS ENGINEER

Greensburg, ID

Are you looking to join a dynamic team where you can provide expertise in automation and electrical controls at our manufacturing facility in Greensburg, IN? This opportunity will allow you to design, develop, and optimize electrical control and automation systems, focusing on safety, reliability, quality, and sustainability. This role will coordinate the development, procurement and implementation of equipment that supports New Product Development, while having the opportunity to drive continuous improvement initiatives throughout the facility.

HIRE HEROES USA DIRECT PLACEMENT ROLES

SR. VOIP ENGINEER

Quantico, VA

As a Senior VoIP Engineer, the individual will oversee and manage all components of the Cisco Unified Communication Manager cluster. In this role, the Engineer will monitor and control the performance and status of voice and video resources across multiple enclaves and locations utilizing software and hardware tools. In addition, the individual will work to ensure all voice applicable STIGs and vulnerabilities are resolved or mitigated in a timely manner.

SENIOR SOFTWARE ENGINEER

Willowbrook, IL

We are seeking a self-motivated, detail-oriented, and collaborative senior developer to contribute to the development of new software products and enhance existing applications. The ideal candidate excels in real-time full stack application development and possesses strong communication and UI design skills.

CSFC SYSTEMS ENGINEER

Wright-Patterson Air Force Base, OH

As the CSfC Systems Engineer, the individual will assist and support the development, configuration, testing, and evaluation of Commercial Solutions for Classified (CSfC) solutions used to secure government customers' classified data and networks. The Engineer will work individually and as a member of a team to configure network, software, and hardware networking components and security appliances and applications to meet DoD requirements and support their installation and initialization onsite in the customers' environments.

FEATURED TRAINING PARTNERS

Unmudl

Unmudl specializes in helping job-seekers land in-demand technician roles, such as those paying \$55K–\$110K/yr in robotics and automation. Veterans can jumpstart their careers in these industries by creating a profile and unlocking:

- Firsthand insights from experienced technicians through exclusive *Techs of Tomorrow* video content.
- Employer connections: Get seen by hiring managers looking to hire for technician positions.
- Access to employer training that can get you job-ready in as little as 8 to 12 weeks (free trials and scholarships available).

[Click here to get started](#) or reach out to learnersupport@unmudl.com with any questions.

Academy of Advanced Manufacturing

The U.S. manufacturing sector is predicted to produce nearly 3.5 million jobs over the next decade. But with more than 20% of manufacturing workers set to retire by 2025 and new technology driving evolving skills requirements, more than 2 million of those jobs could go unfilled. ManpowerGroup and Rockwell Automation have partnered to create an innovative solution, The Academy of Advanced Manufacturing, in which we train military veterans for careers in high-demand technical roles. AAM is a 12-week, expense-free intensive program, designed specifically for veterans. AAM combines technical classroom training and hands-on lab experience with professional development and soft skills training necessary to become a highly trained Automation/Instrumentation/Controls Technician.

AAM was created to help you, and other Veterans, secure a meaningful career following service to our country in a High-Tech role within the Advanced Manufacturing and Automation field. AAM takes care of your expenses during the 12 weeks of certification training including lodging, food, computer, tools, software, hardware and transportation to and from the provided lodging to the training facility. Not only do we take care of your expenses for AAM during these 12 weeks, you will also be paid a modest salary for 40 -46 hours of training each week.

To learn more or to apply, visit go.manpowergroup.us/aam.
